Your music + our passion

Connectivity

Sonata is much more than just a great sounding iPod-friendly hi-fi system...

It's also the perfect TV upgrade

In 2.1* configuration Sonata is the ideal way to optimise the sound from your television. Placed below your screen, connect up your TV sound through Sonata's stereo inputs and be prepared for a pleasant surprise. Sonata will dramatically improve the audio performance from your TV and of course you can also enjoy your favourite movies with the DV30 DVD player.

It's part of a wireless network

Sonata is made for digital music even if you don't have an iPod. As well as having a high performance CD or DVD drive with premium DACs the inputs on the back of Sonata also allow you to plug in any brand of MP3 player. Furthermore, it also allows you to use a wireless system such as Apple's Airport Express to stream music direct from your computer's hard drive. Sonata's audiophile pedigree is guaranteed to deliver stunning sound from your digital music collection.

*Two front speakers plus subwoofer

It's optimised to deliver the most from your iPod

Sonata's custom-designed iPod dock comes as standard and gives your iPod a new lease of life. Drawing every last drop of musical detail from your portable collection this is an iPod dock on a mission to actually improve the sound of your digital music thanks to Cambridge Audio's quasi-differential noise cancelling technology.

It's part of a multi-room music system

Digital music systems such as Sonos and Squeezebox are perfect partners for Sonata. These systems are designed so your music is stored on a hard drive in one room and zone players linked to amplifiers or active speakers are in others. Thanks to its audio inputs Sonata makes an ideal partner for these systems as well as giving you instant access to tracks stored on any connected iPod.

Made for **iPod Mini**,
iPod (4th, 5th generation),
iPod Nano (1st, 2nd, 3rd, 4th generation),
iPod classic,
iPod touch (1st, 2nd generation).
Compatible with:
iPhone (flight mode recommended)

Sonata

Introducing Sonata, a real high performance Cambridge Audio hi-fi in miniature!

Music is important to us all. It lifts the spirit and enriches our lives. But as audio systems have become smaller, many manufacturers have been short-changing us over what's possible from a compact unit. After two years' engineering development, Cambridge Audio at last has the answer.

In common with Cambridge Audio's legendary hi-fi systems, Sonata provides an incredible audiophile experience whatever music you're into, but in an array of compact, beautifully finished and styled components. Measuring just 10.5 inches (27cm) wide and 2.5 inches (7cm) in height you can now enjoy premium sound and legendary Cambridge Audio value from a small format. At the heart of the system Sonata's stereo receiver truly brings your iPod alive with its high performance remote controlled iPod dock. With Sonata you can also choose to add an optional upscaling DVD player for the crispest pictures and captivating soundtracks or opt for the matching CD player and experience an all-encompassing premium quality hi-fi system.

iPod is a trademark of Apple Inc., registered in the U.S. and other countries.

Pop your iPod in the supplied dock and enjoy stunning quality sound through Sonata. Control using your iPod or supplied Navigator remote.

DR30 / AR30 integrated 2.1 receivers with noise cancelling iPod dock

Sonata's beauty is way more than skin-deep. Offering genuine Cambridge Audio hi-fi performance, the 2.1 receiver features a substantial toroidal transformer and discrete amplification for an incredibly dynamic sound. Micro surface-mount circuit technology further improves performance and helps deliver quality previously only available from full size hi-fi separates. The result is a highly detailed yet rich soundstage plus substantial power output at 40 watts per channel (8 Ohms).

Complete iPod integration

Sonata's custom-designed iPod dock can vastly improve your digital music thanks to Cambridge Audio's quasi-differential noise cancelling technology. Drawing every last drop of detail from your music collection, the neat yet sturdy dock accommodates any iPod and the supplied Navigator remote offers armchair control of your iPod, CDs, radio and amp controls. Other MP3 players can also be connected via the front connection and accessed using a dedicated 'MP3' source selector.

Not only does Sonata perform superbly, it looks absolutely fantastic thanks to a stunning high-end brushed aluminium finish and is available in either black or silver.

Two versions of the receiver enable you to choose from DAB/FM or FM/AM* broadcasts both with RDS and 20 presets, you're assured of both intuitive operation and detailed, crisp sound.

* North American version is SIRIUS ready - Requires purchase of tuner device in order to activate SIRIUS service.

DV30 – Upscaling 1080P HDMI DVD player

For those wishing to make the most of their DVD library without resorting to the complexity of a full multi-channel set-up, the accompanying DV30 DVD player is hard to beat. With a high specification chipset upscaling to 1080p over HDMI, it produces extremely crisp pictures with faithfully rendered tones and the deepest blacks. A subwoofer output allows the DV30's low-frequency channel to be routed via the receiver for true 2.1 performance from movies.

CD30 – Audiophile CD player

The audiophile CD30 player features an entirely new servo transport solution providing the highly-regarded digital platform for which Cambridge Audio is renowned. In common with Cambridge Audio's award-winning CD players, the CD30 uses a high grade Wolfson Digital to Analogue Converter for sensational sound and stereo imaging. For convenience, the CD30 powers-up automatically when CD source is selected from the receiver.
