tangent DENMARK

The philosophy behind the Tangent products is built around four cornerstones; quality cabinets, superior sound reproduction, ease of use, and finally the ability to suit every interior decor. The result is a range of products that will fulfil all of your needs, whether you are looking for a radio, a speaker, a hifi setup or a iPhone or iPod dock.

SHOWCASING A TRUE TREASURE

It's human nature to hold some of our possessions dear. From heirlooms passed on through generations to gifts from far-off lands, each occupies a special place in our hearts. A true treasure - like true love - is limitless.

Many Tangent audio customers share the same love for their music collection. It's with them wherever they go, ever growing, ever eternal. And no matter the technology, their commitment to it never fades.

That's why the designer Jean-Yves Le Porcher together with the team at Tangent set out to create a docking station and loudspeaker solution for Apple products that reflected this same kind of love. New this season, the Tangent PearlBox is a glamorous, great-sounding solution for spreading the love.

The auto-detect function recognises the device on its own, engages the product's display, and is ready for operation. Leap through your music collection as usual, and enjoy the powerful sound of the PearlBox without waiting. Great sound and great looks combine once again in a Tangent product.

With an absence of buttons, the question of operation the PearlBox logically arises. Two solutions are possible: directly or remotely. Normal hands-on operation directly on the Apple device does not vary from when you're holding it in your hand.

Want to see the Pearlbox movie? Scan this code with your iPhone® barcode/QR scanner to watch.

SPECIFICATIONS

Power output:	2 x 8 Watt RMS @1% THD
Standby consumption:	<1W
Speaker:	3" dual voice coil woofer
